Summary

Pre-final year CS undergraduate at BIT Mesra with hands-on experience building **agentic AI systems** powered by **LLMs** and **API-driven automation**. Strong foundations in **prompt engineering**, **AI agent orchestration**, and full-stack development. Passionate about **Responsible AI**, retrieval-augmented generation (**RAG**), and applying AI research to solve real-world enterprise challenges. Proven problem-solver with **500+ DSA problems** solved and top **5%** global contest rankings.

Education

Birla Institute of Technology (BIT), Mesra

Bachelor of Technology in Computer Science and Engineering (CGPA: 7.8/10)

Ranchi, India

Aug 2023 – May 2027

Technical Skills

AI/ML & LLMs: Python, LangChain, OpenAI API, Claude API, Prompt Engineering, RAG Pipelines, Vector Databases (ChromaDB), Hugging Face Transformers

Languages & Frameworks: C++, Java, JavaScript (ES6+), TypeScript, React.js, Next.js, Node.js, Express.js

Databases & Infrastructure: MongoDB, Firebase (Firestore, Auth), PostgreSQL, Docker, Redis, Vercel

Tools & Foundations: Git, Linux, DSA, OOP, DBMS, OS, Computer Networks, Responsible AI Principles

Projects

ExecOS: Autonomous AI Agent | Next.js 14, Claude 3.5 Sonnet, LangChain, Google APIs Jan 2026 – Feb 2026

- Engineered an **agentic AI system** using **Claude 3.5 Sonnet** with multi-step **prompt chaining** and tool-use orchestration to autonomously process **100% of incoming emails**, identifying high-priority tasks and generating contextual drafts with **95% accuracy**.
- Designed a **Retrieval-Augmented Generation (RAG)** pipeline to ground LLM responses in user-specific context (email history, calendar events), reducing hallucination rates by **40%** and improving response relevance.
- Implemented **Responsible AI** guardrails including output validation, PII filtering, and human-in-the-loop review mechanisms for sensitive actions, ensuring safe and transparent autonomous decision-making.
- Built a secure integration layer with **Gmail and Google Calendar APIs** using **AES-256 encrypted** session storage, automating **20+ weekly events** from natural language requests with **99.9% uptime**.

MyDrive: Scalable Cloud Storage | React, Node.js, Firebase Storage

July 2025 – Aug 2025

- Built a cloud storage platform handling **1,000+ secure file uploads** with custom **Role-Based Access Control (RBAC)**, ensuring complete data isolation and reducing unauthorized access attempts to **0%**.
- Optimized NoSQL data models in **Firestore**, achieving **30% reduction** in read costs and **sub-200ms latency** for real-time metadata synchronization across devices.
- Implemented chunked file upload with resumable logic, improving upload success rates by **15%** with real-time progress tracking via modern React hooks.

Real-Time Tracking System | React, Node.js, Socket.IO, Leaflet.js

June 2025 – July 2025

- Developed a low-latency geographic tracking system using **Socket.IO** for bi-directional communication, delivering live updates every **2 seconds** with **99% sync reliability** across concurrent sessions.
- Engineered state-persistence and proximity alerting with geometric distance algorithms, handling **10+ simultaneous users** while maintaining **60 FPS** frontend performance.

Experience

Full Stack Developer | Infinity Classes | React, Node.js, Express

Jan 2026 – Mar 2026

- Architected a full-stack educational platform driving a **20% increase** in student registrations and streamlining inquiry workflows for **500+ users** within **60 days** of deployment.
- Optimized rendering paths using lazy loading and SEO best practices, achieving **35% reduction** in page load time and **+15 points** on Google Lighthouse scores.

Honors and Achievements

- Achieved **Max Rating 1745** on LeetCode, solving **500+ complex DSA problems** with focus on Graphs and Dynamic Programming.
- Ranked **914 out of 20,000+** in LeetCode Biweekly Contest 163 (Global Top **5%**).
- Attained **Specialist** rank on Codeforces (Peak: **1417**), competing in international algorithmic contests.
- Shortlisted for **Round 2** in **Smart India Hackathon (SIH)** from thousands of national-level applicants.
